Subject: Pre-Construction Survey Documentation Services for the Newton
North High School Grandstand Demolition Project, 360 Lowell Street,
Newton, MA

Dear Property Owner:

Please be advised that PreSeis, Inc., an independent consulting firm, has been contracted by Dimeo Construction Company to perform Pre-Construction Documentation Services on homes either abutting the site of construction activities for the new Newton North High School Project or located within 250 feet of the Newton North High School stadium which will be demolished this summer.

The purpose of the Pre-Construction Survey is to establish a baseline record relevant to the pre-existing conditions of your home prior to the commencement of scheduled construction activities. The Pre-Construction Survey is a precautionary procedure, and no damage is anticipated to your property in any way. The Pre-Construction Survey is being provided at no cost to you and is entirely voluntary.

Depending on the size of your property, the survey typically takes approximately one hour to perform for both interior and exterior portions of the home and details any pre-existing defects such as cracks, separations, water damages, and/or other typical conditions often present in most structures. All original materials used to perform such surveys shall remain on file at our local office facility.

All survey appointments are generally scheduled on hourly increments and are coordinated on a first come first serve basis. If for some reason you are unable or do not want to have the interior of your home surveyed, PreSeis, Inc. would be happy to perform an exterior only survey in your absence and with your consent.

Construction activities are scheduled to start on June 18, 2007. The Pre-Construction Survey should be done, if possible, prior to commencement of construction activities. To schedule an appointment or to address any questions you may have, please contact our office **by June 5, 2007**, at (888)-764-8900 or by e-mail, denise.bonanno@preseis.com, with reference to PSI Project #07-137. If you are unable to contact us during normal business hours, please leave a detailed message along with your contact information, and we will return your call or e-mail promptly.

Your cooperation in this matter is greatly appreciated.

Sincerely,

PreSeis, Inc.
